

PROJECTION

**MEDIASPHERE
MULTI TOUCH**

This stunning spherical projection system is ideally suited for the presentation of "global" content such as branch locations of globally operating businesses, shipping routes, geographic-, meteorological- and political data, or just about any spherical content (think animated footballs, eyes etc).

The integrated, high-intensity projector provides a high-contrast display even in bright surroundings and the high-precision multi-touch control allows the joint exploration of the content simultaneously by multiple users.

Different single- or multi touch solutions allow interactive control.

FEATURES & FUNCTIONS

- Highly intuitive operation and navigation
- Ergonomic system architecture
- Precise touch sensor
- Brilliant and high-contrast screen
- Universal interface for standard PC
- Special sizes on request

TECHNICAL DATA

Spherical segment diameter	102 cm
Weight	ca. 50 kg
Projector	Laser-DPL, WUXGA 10.000 Ansi-lumens
Material	Acryl with special coating
Content-Formats	Video & Data
Optional	Pedestal in each colour and material
